I'm a retired professor of both computer science and mathematics; I started doing computer science in the early 60's when it was just beginning to be thought of in academia. Get some data on how many students start CS and end up in something else, often math. CS is damn hard; many students switch out in their sophomore year, when they first have to deal with a data structures course ...

Step 3: Trust Your Computer (Only if Possible) Again, your iPhone may not be working at all. If that's you, skip to the next step. But if your iPhone is still working a little bit, you may need to "trust" the computer if it's your first time connecting the two devices. If you want to, you can untrust the computer later.
