Minimizing and managing land-related conflict is a key governance task in the post- conflict period, just as it is before violent conflict erupts. Policies that are relevant in limiting conflict and reducing tensions in the pre-conflict period are just as relevant now, but many can only be deployed if investment has been made in rebuilding government capacity.

Land-use planning is the process of regulating the use of land by a central authority. Usually, this is done in an effort to promote more desirable environmental outcomes as well as a more efficient use of resources. More specifically, the goals of modern land-use planning often include conservation, restraint of urban sprawl, minimization of transport costs ...

Water conflict is a term describing a conflict between countries, states, or groups over the rights to access water resources. The United Nations estimates that water disputes result from opposing interests of water users, public or private. A wide range of water conflicts appear throughout the world, rarely are traditional wars waged over water alone.
